CHAIRMAN'S Message

Greetings fellow alumni and friends!

During our recent well attended and productive Winter board trustee meeting, held in Irvine Marriott CA, I am very pleased that together we have been able to set the groundwork for the next term.

OSCAR C TUAZON MD

It has been proposed that we brainstorm new ways to cut down the Alumni Foundation's spending and find opportunities to help to grow and build the endowment.

After much discussion, the board trustees unanimously passed a proposal to cut funding for medical missions.

I am also delighted to announce that we would be able to tap into Class funds and raise at least \$18,000!

I hope to renew these discussion again at our next board trustees meeting in July, that we can find additional sources for our fundings.

As we welcome the Spring months, I want to inform you that our 36th annual reunion and scientific convention!

The venue is the Caesar's Palace Las Vegas.

MESSAGE FROM THE CHAIRMAN

Greetings from sunny, smoggy and earthquake-belt California!

It's that time of the year for our annual homecoming and medical seminar, to reminisce the good old days, to renew our long standing friendship and to reassess our

Continued on page 11

MESSAGE FROM THE PRESIDENT

With this message, I am closing my final year as president of the Alumni Foundation. I am not, however, closing my year of service to the Foundation if the board of trustees gives me the opportunity to move up to the position of Chairman.

I want to thank the Alumni, particularly those who have been involved as members and/or have attended the annual reunions and seminars. I especially want to thank those who have helped the Medical School with donations for student achievement awards,

FAITH CORNER

REV MELVIN ANTONIO MD⁶⁵

The Book of Acts, sometimes called Acts of the Apostles, was written by the same author who wrote the Gospel of Luke in the New Testament. The term *apostle* comes from the Greek word meaning *one who*

REV MELVIN

is sent out.

The book chronicles the beginnings of the Christian movement in the decades after the death and resurrection of Jesus Christ. It is a highly informative book on how a small band of dedicated men and women of faith fulfilled the commission to go and make disciples of all nations, baptizing in the name of the Father and of the Son and of the Holy Spirit. **Matthew 28**

In a study of the New Testament, it is best to read Acts as you read the letters of Paul, Peter and the other apostles to better appreciate where, why, and under what circumstances these letters were written.

The story of Philip and the Ethiopian official is one of the more interesting conversion stories in the book. **Acts 8:26 – 40** In the story, we have an Ethiopian who is a very important official in the court of a queen. However, he is also a eunuch. It was common practice in ancient society that men who served around female royalty such as queens, princesses, and

ROLANDO M SOLIS MD⁶³

PRESIDENT AQUINO

Meets us in Chicago

**NIDA BLANKAS HERNAEZ
MD⁸⁴ FAAP**

Immediate Past PMAC President

The purpose of President

Benigno Aquino III's visit in Chicago as highlighted in his speech was to gain continued support for good governance among us, all Pilipinos abroad, and to encourage everyone one to *improve our country*

not only with passion, dedication and good will, but with opportunities to uplift ourselves, our country in order to contribute to the advancement of the entire world.

Reflecting our President's guiding principle, *good governance equals good economics, equals good quality growth*, our country has become the 2nd fastest growing economy in the world.

Through good governance and good leadership, we are encouraged to have genuine commitment and strong determination to continue to deliver our yearly medical mission to our motherland, for the betterment of our *kababayans* and to overcome poverty.

Let us continue our mission endeavor despite the hassles and bushels, the bumpy road, bumpy flight and bumpy waters, the sacrifice and hardship of preparing for it,

LEADERSHIP HUMANITARIAN SERVICE

**DANIEL C FABITO MD⁶⁴
FACS**

Before 1980, medical-surgical missions in the

Philippines were not priority projects of organizations of Pilipino doctors here in the United States. There were maybe isolated missions carried out by individual

physicians when they visited their hometowns and probably some religious groups; but there were no organized and dedicated humanitarian endeavors by Philippine medical associations, Philippine medical schools alumni associations, and chapters of the Association of Philippine Physicians in America (APPA) and the Society of Philippine Surgeons in America (SPSA).

In my APPA inaugural speech in Miami Beach as the 7th president in 1980, I made a clarion call to my fellow physicians and said *having achieved comfort and stability in this country, we ought to share our bounty and expertise with the people back home. We should extend our helping hand to the poor and indigent in our country.* Subsequently, I formed the APPA-Philippine medical aid assistance which partnered with the Philippine Medical Association in areas of medical missions, postgraduate education and training,

Day 10, Sunday – We

remembered our Sunday obligation to go to church. This was also a full-day excursion to Greccio Sanctuary where the

**NOLI
GUINIGUNDO MD**

first nativity in the history in 1223, and to the Holy Valley where St Francis used to wander and pray. At the former, St. Francis wrote the famous Canticle of Creatures, which is located in a magnificent setting.

We enjoyed the trip. The next day was another a full-day excursion to the Convent of Saint Cosimo in Vicovaro in a splendid natural setting of the National Park of Monti Lucretili, where numerous caves were once inhabited by hermits. The labyrinths were so deep, dark, and small, that made me wonder how those hermits were able to stay and tolerate living in such places.

We arrived in Subiaco and visited the monastery where St Benedict lived as a hermit before he organized his first monastic community.

By the way, the Convent of Cosimo was kept clean by our female host who also treated us with coffee and some muffins that she baked. We were also able to go to an old church in Monti Lucretili where a mass was said in Italian; at least we were able to fulfill our Sunday obligation.

PEACE 2015 Lifetime Achievement Award

COSME CAGAS MD
PEACE Executive Director
Cesar V Reyes MD⁶⁸
recently received a Lifetime Achievement Award from the Philippine Economic and Cultural Endowment (PEACE - USA) at the Hilton Garden Inn in O'Fallon, Illinois

Dr Reyes, third from left, is surrounded by Engineer Dijen So, PEACE executive director and AFPSI 2015 lifetime achievement awardee Cosme Cagas MD, immediate APPA past president Leonor Pataghan So MD, PEACE2015-2017 president Urbano Daus, AFPSI treasurer Grace Farinas, AFPSI auxiliary governor Grace Farinas, Elisa Reyese RN, Virginia Daus MD Enrico Faricnas MD, Marylyn Lopez RB, and PMAC president Ramon Lopez.

the arenas of leadership, teaching, writing and publishing scientific papers as well as in his chosen discipline of Pathology which led him to occupy top positions in hospitals and medical centers. For decades, he has also continued to serve as editor of

several medical publications. Currently he works gratis as consultant in cytopathology and dermatopathology.

AUGUSTUS P SORIANO MD, President; and **CARMELO C DICHOSO MD**, Chairman of Awards Committee

MAY QUOTES

Blessed is the man who does not walk in the counsel of the wicked or stand in the way of sinners or sit in the seat of mockers.

But his delight is in the law of the LORD, and on his law he meditates day and night.

He is like a tree planted by streams of water, which yields its fruit in season and whose leaf does not wither. Whatever he does prospers.

Psalm 1:1-3

Where God's love is, there is no fear, because God's perfect love drives out fear. It is punishment that makes a person fear, so love is not made perfect in the person who fears.

John 4:18

pathologic reports of unusual cases published in the Philippine American Medical Bulletin and other publications way back in the 1980s.

In recent years, he has edited the newsletters of three medical organizations monthly and simultaneously, a feat that is unprecedented anywhere.

He was nominated as Editor or Writer of the Year to the PEACE Awards Committee but upon scrutinizing his curriculum vitae, the committee disagreed, saying that editing and writing are only two of Dr Reyes' shining accomplishments and that he deserves a broader recognition that encompasses his life-long work, thus the lifetime achievement award as can be gleaned in the etchings of his big wooden plaque as penned by Awards Committee chairman Carmelo C Dichoso MD of Sugarland, Texas:

For his relentless commitment to excellence in medical education that has pervaded the totality of his professional endeavors. Consequently, he has amassed laudable accomplishments in

Dr Reyes receives the plaque from PEACE executive director Dr Cosme Cagas.

The occasion was a combined meeting of the Association of Filipino Physicians of Southern Illinois and PEACE.

Dr Reyes becomes the third person to have received the award in PEACE's 29 years history, the first two recipients having been Lestrino C Baquiran MD of New York City and Gil R Pilapil MD⁶¹ of Springfield, Illinois. Drs. Baquiran and Pilapil had served as PEACE presidents prior to their receiving the award.

Dr Reyes caught the attention of PEACE as a hard working and prolific writer starting with clinical and

PEACE executive director Cosme Cagas MD, left, inducts the AFPSI 2015-2016 officers that includes Arnel Garcia MD⁸⁵ (third from left) and Claravel Criste MD⁹¹ (in bright yellow gown). AFPSI new president, is Nic Pineda MD, extreme right.

FEUMAANI president Richard Mon MD⁷⁰ and Leilanie Mon MD⁷² are shown handshaking with President Noyon Aquino who turns head, with yellow tie, seated in front.

LETTER TO THE EDITOR

I read with great interest the case presentation of a Stage 4 B rectal carcinoma in a 33-year old woman treated with primary systemic chemotherapy with symptomatic

RUDY BACOLOR MD

improvement and endoscopically partial improvement of the rectal lesion and stabilization of liver and lung metastases on imaging studies.

At age 33, I wonder whether a detailed family history was obtained for hereditary syndromes to account for the early onset of cancer in this patient. Is genetic consultation/genomic studies being

considered? Was drugable tumor predictive tumor marker obtained? Is the patient currently fit to undergo surgical removal of the primary rectal tumor to prevent obstruction/ bleeding in the future and possibly improving response to second line chemotherapy by reducing the tumor burden. Thank you.

RUDY BACOLOR MD⁶³

PROPOSED CONSTITUTIONAL AMENDMENTS

DANIEL C FABITO MD⁶⁴
FACS

I AM SENDING YOU A NOTICE
(NOT A MOTION) FOR THE

PROPOSALS OF
AMENDMENTS TO
THE FEUDNRSM
ALUMNI
FOUNDATION
CONSTITUTION AND
BY-LAWS WITH
AMPLE TIME AS
REQUIRED 30 DAYS
TO BE SUBMITTED
FOR CONSIDERATION
AT THE NEXT BOARD

MEETING, FOR THE MEMBERS TO
STUDY, DELIBERATE AND MAKE
INTELLIGENT RECOMMENDATIONS,
FOR APPROVAL, OR DISAPPROVAL,
BY THE BOARD OF TRUSTEES
DURING A DULY CONSTITUTED
BOARD MEETING.

OF COURSE THE CONSTITUTION
AND BYLAWS COMMITTEE
MEMBERS MAY ELECT TO HAVE
FURTHER DISCUSSION ON THE
PROS AND CONS OF THE
PROPOSALS. ONE OF MEMBERS, OR
A BOARD TRUSTEE SHOULD
INTRODUCE A MOTION FOR
ADOPTION OF ALL OR PART OF THE
PROPOSED AMENDMENTS.

TREASURER: THE TREASURER
COULD BE ELECTED TWICE, WHICH
MEANS THAT THE TREASURER
COULD SERVE ONLY A MAXIMUM
SIX YEARS (OR THREE TERMS WITH
TWO YEARS PER TERM).

DR AUGUSTO LASTIMOSA HAD
SERVED SIX YEARS BEFORE DR
GRACE RABADAM WHO HAS
ALREADY SERVED SIX YEARS. SHE
HAS BEEN REELECTED AGAIN. THIS
IS OBVIOUSLY IN VIOLATION OF
THE PROVISIONS.

TO RECTIFY THIS SITUATION, WE
SHOULD REMOVE THE TERM LIMIT
FOR TREASURERS.

THIS IS A NOTICE (NOT A
MOTION) FOR PROPOSED
AMENDMENTS TO THE
CONSTITUTION AND BY-LAWS,
WHICH SHOULD BE REFERRED TO
THE CONSTITUTION AND BY-LAWS
COMMITTEE FOR STUDY,
DELIBERATION AND
RECOMMENDATION TO THE BOARD
TRUSTEES, FOR ADOPTION, OR
NON-ADOPTION.

IT IS THE RIGHT OF ANY ACTIVE
MEMBER TO INTRODUCE
AMENDMENTS TO THE BY-LAWS.

CHAIRMEN *EMERITUS* ARE ONLY
RESTRICTED BY THE BY-LAWS,
NOT TO MAKE MOTIONS AND NOT
TO VOTE DURING A LEGALLY
CONSTITUTED MEETING OF THE
BOARD TRUSTEES.

EXISTING PROVISION: SECTION 3
STATES ELECTION OF OFFICERS
AND TERMS - THE CHAIRMAN OF
THE BOARD, PRESIDENT AND
EXECUTIVE VICE PRESIDENT SHALL
SERVE ONLY FOR ONE TERM.
OTHER OFFICERS MAYBE RE-
ELECTED TWICE.

PROPOSAL: THE CHAIRMAN OF
THE BOARD AND PRESIDENT OF
THE ALUMNI FOUNDATION SHOULD
SERVE FOR ONLY ONE TERM. THE
EXECUTIVE VICE PRESIDENT,
REGIONAL VICE PRESIDENTS,
SECRETARY, TREASURER AND
INTERNAL AUDITOR MAYBE RE-
ELECTED WITHOUT TERM LIMITS.

RATIONALE: THE OFFICE OF THE
EXECUTIVE VICE PRESIDENT AND
TREASURER SHOULD HAVE NO
TERM LIMITS TO MAINTAIN
CONTINUITY OF THEIR EXCELLENT
PERFORMANCES OF THE
POSITIONS WITHOUT VIOLATION
OF THE PROVISIONS RELATED TO
THESE OFFICES.

APPROVED PROVISIONS LAST
YEAR:

1 - CHANGE ALL THE WORDS
CHAIRMAN TO CHAIRPERSON.

PROPOSAL: DELETE
CHAIRPERSON AND REVERT TO
CHAIRMAN. THE CHANGE OF
CHAIRMAN TO CHAIRPERSON HAS
NO SIGNIFICANT RATIONALE.
THE PROVISIONS OF ARTICLE VII
SECTION 10 ON BOARD
CHAIRPERSON *EMERITUS* AND
CREATION OF *AD HOC* COMMITTEE
WHICH WERE APPROVED LAST
YEAR SHOULD BE DELETED.

THE PROCESS INVOLVED ARE
CUMBERSOME WITH POTENTIAL
PROBLEMS, ANIMOSITY AND
CONFLICTS IF A NOMINEE FOR
CHAIRMAN *EMERITUS* IS NOT
VOTED AFFIRMATIVELY.

PROPOSAL - THE CHAIRMAN OF
THE BOARD SHALL
AUTOMATICALLY BE BESTOWED
THE TITLE OF CHAIRMAN *EMERITUS*
THE DAY FOLLOWING THE
EXPIRATION OF HIS/ HER TWO
YEAR TERM, UNLESS HE/ SHE
ELECTS NOT TO SERVE AS
CHAIRMAN *EMERITUS*, NOTIFYING
THE ALUMNI FOUNDATION IN
WRITING.

PROPOSAL: A VICE CHAIRMAN
OF THE BOARD SHOULD BE
CREATED.

RATIONALE: CURRENTLY THE
PRESIDENT OF THE BOARD AFTER
HIS TERM HAS TWO YEARS OF
BEING INACTIVE BEFORE BEING
ELECTED AS CHAIRMAN OF THE
BOARD. TO PREVENT THE TWO
YEAR HIATUS OF INACTIVITY, A
VICE CHAIRMAN SHOULD BE
CREATED SINCE IT WILL ALSO SET
UP A MORE SMOOTH TRANSITION
OF POSITIONS FROM THE
PRESIDENT, VICE CHAIRMAN AND
ULTIMATELY CHAIRMAN OF THE
BOARD.

NOTE: AMENDMENTS TO THE
CONSTITUTION AND BYLAWS
COULD BE INTRODUCED FROM THE
ACTIVE MEMBERS AND ALSO FROM
THE MEMBERS OF THE COMMITTEE
ON CONSTITUTION AND BYLAWS.

THE BOARD OF TRUSTEES HAS
THE FINAL APPROVAL, OR
DISAPPROVAL OF PROPOSED
AMENDMENTS DURING A LEGALLY
CONSTITUTED BOARD OF
TRUSTEES MEETING.

OBITUARY

ROGELIO G FAILMA MD⁶⁵
died on May 18, 2015, at
Lutheran General Hospital from
infectious complication
following an undiagnosed
abdominal aneurysm surgery.

Dr Failma had recently
served as an attending urologist
at Provident Hospital of Cook
County. He received his
Bachelor of Arts from the Far

Eastern University Institute of Arts and Sciences, and medical degree from the FEU Institute of Medicine. He belonged to Class⁶⁵.

He trained in general surgery at Grant Hospital of Chicago and American Hospital, completed his Urology residency at the Edward Hines Veterans Affairs Hospital in Hines IL.

He was board certified by the American Board of Urology and a member of the American Urological Association. His clinical interests included general urology, erectile dysfunction, benign prostatic enlargement, urinary tract infections, and prostatitis.

Visitation was held on May 22, 2015, at the Haben Funeral Home, Niles Center Road, Skokie IL. Funeral was the following Saturday, May 23, 2015, with a mass at St Peter Catholic Church, Niles Center, Skokie IL. He was interred at the All Saints Cemetery on Golf Road, Des Plaines IL.

Dr Failma was survived by his wife, Noli, a daughter, two sons, and seven grandchildren.

Please address your condolences to:

Mrs Noly Failma

3 Reba Court
Morton Grove, IL 60053

MAY QUOTES

The Impartial Friend: Death, the only immortal who treats us all alike, whose pity and whose peace and whose refuge are for all--the soiled and the pure, the rich and the poor, the loved and the unloved.

CLINICAL IMAGES

FIBROADENOMA IN AXILLARY ECTOPIC BREAST TISSUE

Figure 1 – Left axillary ultrasound discloses a figure-of-eight, well circumscribed, well demarcated mass of 2.0-cm dimension, that is clinically and imaging-wise interpreted as enlarged lymph node.

Figure 2 – Fine-needle aspiration Cytology proves a benign diagnosis of fibroadenoma, showing metachromatic fibrous stroma, bipolar spread-out benign stromal cells, and sheets/ staghorn clusters of mixed ductal and myoepithelial cells (Diff Quik stain, x200).

Figure 3 – Excised mass is fish-flesh well demarcated, well circumscribed, fully encapsulated, and nodular, in a background of fibroadipose tissue

Figure 4 – The tumor is an equal admixture benign ductal epithelial cellular structures and benign stromal cell proliferations (Hematoxylin eosin stain, x100).

These **IMAGES** are from a 30-year-old, nulliparous, woman who presented with a painless growing tumor in the left axilla. She had normal breast development and no comorbidity. She never used

contraceptive pills. There was no family history of breast cancer and polymastia. On physical examination, symmetric breasts were observed, but no masses or nipple discharge. In the left

axilla, there was a subcutaneous mass that was freely mobile, well circumscribed, painless, fairly hard and completely isolated from the left breast, appearing like an enlarged lymph node of 2.0-cm size. There was also no associated

nipple, areola or skin changes. No similar alterations were found in other parts of her body.

An ultrasonography of the left axilla revealed a clearly circumscribed homogeneous solid nodule with a diameter of 2.0 x 1.9 x 1.4 cm (**Figure 1**), clinically and radiologically interpreted as a lymph adenopathy. No evidence of supernumerary breast tissue was seen.

DIAGNOSIS. Preoperatively, a fine-needle aspiration cytology was interpreted as benign cytology, consistent with fibroadenoma (**Figure 2**) in probably ectopic axillary breast tissue. The patient underwent surgical resection of the nodule in axilla and all clinically visible tumor was totally excised (**Figures 4 and 3**). Histopathological examination revealed a diagnosis of classic of fibroadenoma --- as reported in the FNAC evaluation.

Six month follow-up indicated no recurrence and an asymptomatic patient.

COMMENTS and LITERATURE REVIEW.

Ectopic breast tissue occurs in 2 to 6% of the general population and is classically distributed along the embryonic milk line which extends from the axilla to the pubic region.

The axilla is the most common site, accounting for approximately 60 to 70% of accessory breast tissue.

The diagnosis of ectopic breast tissue is important because it may be affected by the same physiological and pathological alterations seen in the normal breast, including fibroadenoma, and therefore subject to the same mastopathy,

whether benign or malignant, which affects naturally positioned breasts.

Although carcinoma of the axillary accessory breast is rare, accounting for 0.3% of all breast cancers, the most frequent condition in the accessory breast is breast cancer followed by mastopathy and fibroadenoma.

Reports describing these lesions are rare; and there are less than 30 cases published to date.

The differential diagnosis for a solitary axillary mass is very broad, including lymphadenopathy, breast parenchymal lesions, and infectious and vascular lesions, as well as an axillary tail of Spence (extension of normal parenchyma towards the axilla) or a torn muscle belly. It is important to differentiate benign from malignant axillary masses to avoid unnecessary concern and intervention.

The possibilities of malignancy of breast origin, soft tissue sarcoma, cutaneous or non-skin squamous cell carcinoma, pulmonary small cell carcinoma, lymphoma, chloroma, melanoma, and axillary breast metastases are the most important considerations to exclude because they are of important prognosis and outlook.

Benign lesions of sebaceous cysts, lipomas, and vascular lesions are usually easy to rule out or excluded.

Among inflammatory lesions, these include suppurative hidradenitis, cat-scratch disease, reactive lymphadenitis, or lymphadenopathy secondary to

any upper extremity infection, and tuberculosis.

As the most usual focus of ectopic breast tissue is in the axilla, supernumerary breasts and breast-associated tumors should be kept in mind in the management of patients with axillary mass as a sole clinical feature.

When present without a nipple or areola, it can be a diagnostic problem. Excisional biopsy can readily resolve the dilemma. Tumors in supernumerary breast tissue should be diagnosed using the same pathways applied to normal breast tissue (mammography, ultrasonography, ultrasound-guided fine-needle aspiration cytology and/ or stereotatic-guided vacuum-assisted core-needle biopsy), with observation of specific indications.

However, due to the low incidence of such tumors, diagnosis may be delayed or even ignored, thus making treatment more difficult.

When tumors or nodules are found along the mammary line, the presence of breast tissue should be considered during the investigation.

Fibroadenoma as exemplified in the index patient is a frequent cause of benign tumors in young women. Since they arise from lobules, it is not surprising that these are seen predominantly in women in the 15-25 age group, even though they may be diagnosed later. As alluded already, it rarely is described in axillary supernumerary breasts.

Compilation of reported fibroadenoma in ectopic axillary breast tissue totals to 10 publications. The patients' average age is 33 years (ranging from 21 to 58 years). The mean lesion size is 3.5 cm. The most common site of axillary is right axilla. In one instance, it is bilateral.

In **CONCLUSION**, fibroadenoma must be kept in mind in the differential diagnosis of axillary swellings. When the mass is found in mammary ridge, the presence of ectopic breast tissue must be considered.

A list of **REFERENCES** is available upon request.

CESAR V REYES MD⁶⁸

TENDERLY YOURS

continued from page 5

The gift shop was opened; and we were able to buy some souvenirs. We got several crucifixes, rosaries, and several medals with Latin inscriptions which St Benedict used to cast out the

devil.

Likewise, we saw where he held office and did his prayers. Our guide did a good job in bringing us to these places, which he called off-beaten tour paths. He took us all the way to the highest peak in this valley; and we were scared his jeep would not be able to make it to the top. But it did not fail. As you know, a jeep

is a status symbol in Italy; but to me it is still an American car that starts having problem after you have paid the car loan.

Day 12 was a trip to Venice. Our Hotel California is not too far from the Train Station. We were booked in the high-speed train which cut down the trip from six to three hours. Our guide picked us up at the train station and then we took a boat ride to our Hotel San Luca on Calle dei Fabbri in the heart of city.

Remember that song *if you would go to Venice, you will see a magic town, the streets are flowing river*. This is our second time in Venice and we were more familiar with the place. We still did not ride the gondola.

The Hotel is real nice and clean with free breakfast; and our host at breakfast was a Pilipina who has been in Italy for almost 20 years and spoke fluent Italian. We had a heavy downpour that day; and sidewalk platform were used to help visitors and shoppers not to get wet in the flood water. We also got plastic boots and our raincoat really helped a lot. Souvenirs are aplenty at the Rialto Bridge (remember our Rialto theatre in Manila?)

LEADERSHIP

continued from page 5
cooperative community projects and development.

The *Operation Bayanihan* medical and surgical missions, being the mission arm has organized and

sponsored missions in the Philippines since 1982 to the present in different parts of the country with support from the Pilipino American physicians and hospitals.

I have chaired / co-chaired twenty surgical medical missions and was an active participant in 15 missions from 1981 to 2015 for a total of 35 humanitarian missions.

I spearheaded the first nationally sponsored mission in 1982 in partnership with the Philippine Medical Association of Greater St Louis MO at the Quezon Provincial Hospital in Lucena, Quezon, hosted by the late Governor Eladio Caliwara and the Quezon Medical Society.

In 1994, I also spearheaded and chaired the first medical-surgical mission at FEU-NRMF Medical Center with Class⁶⁸, hosted by the late FEU-NRMF board chairperson Dr Josephine Cojuangco-Reyes, for a week-long mission.

Missionaries usually pay for their transportation and hotel accommodations. The average costs of undertaking a mission project is about \$20,000 (P 900,000), in addition to bringing in boxes and boxes of supplies, medicines and instruments.

Thirty five years of missions therefore cost about \$700,000 (P31,700,000). These amounts were fund-raised usually 10-12 months before the dates of missions.

During the missions, we usually served on the average 1000 medical and pediatric patients and do about 100 major operations and 200 minor operations. For 35 missions, we

**NOLI
GUINIGUNDO MD**

**DANIEL
FABITO MD**

had served 35,000 patients and did 3,500 major operations and 7,000 minor operations.

Translating these services into the total costs of medical care and consultations and the operative procedures done would have easily run into millions of pesos. Conservative estimate of 35,000 per major operation would be P122,500,000; and P10,000 per minor operation would have been P70,000,000 for a total of P192,000,000.

These did not include individual expenses of the missionaries during their stay in the Philippines, with monetary infusion to the local economy.

In 1985, I chaired/ co-chaired the SPSA surgical missions for 15 years until Dr Manuel Cacdac and Dr Pacifico Dorado took over in 2001. The first surgical mission was in my home province of Pangasinan and held about 4-5 more missions in the province since then. The actual statistics of the SPSA surgical missions which I Chaired/ Co-Chaired in 15 years and participated, published in our **Philippine Surgeons** estimated financial benefit to the local economy of P95,000,000 or \$2,280,712 with total number of cases done of 4,418 patients. From the first mission in 1982, which became the model for succeeding missions in the Philippines, there were 158 missions that went to our country in 2011.

As a charter founder of the PEACE (Philippine Economic And Cultural Endowment – USA), the project of providing potable water supply in different *Barangays* in the Philippines, I had donated in

1986 funds for artesian wells and purchase of a drilling equipment through a past PMA president Dr Ed De la Cruz () and the Rotary Club of Mandaluyong East.

Another project, I was involved in was the visit and the vaccinations for measles, mumps and rubella in orphanages, in partnership with Dr Perla Santos-Ocampo who was also a past PMA President of the PMA and World Pediatric Association, and retired University of the Philippines chancellor).

For transfer of new and innovative surgical operations, I had the distinct opportunity to be invited in Cebu City in 1992 at the Southwestern University, and taught 12 fellows of the Philippine College of Surgeons with didactic lectures and hands-on porcine models in the new technique of laparoscopic cholecystectomy other laparoscopic operations. These fellows became the pioneers of this innovative technique in Cebu.

Another legacy that I am proud of is my innovation of the technique of operation for the morbidly obese patients in bariatric surgery with the Fabito gastric stapling which I introduced in 1978. I had done 2500 patients with this technique and has been adopted by bariatric surgeons worldwide.

From 1993 to 2000, I served as president and chairman of the FEUDNRSMAF Alumni Foundation and had played a major and significant role in the relocation project to move the FEU-NRMF medical complex

from Morayta to Fairview Heights, Quezon City.

Our alumni in the United States contributed had donated generous financial help during the fund raising activities and solicitation of pledges and support sponsored by the Alumni Foundation during my eight years tenure as president and chairman of the board.

The Alumni Foundation had contributed about \$650,000 (P29,500,000) to the building fund. The relocation project was a great success with the final transfer in December, 2000.

In 1993, I established a postgraduate medical education program at the FEU-NRMF medical complex to help and assist medical students, interns and residents with surgical textbooks, review materials, equipments, instruments and audiovisual materials (LCDs and computers). The activities and programs are continuing to the present time.

I had also participated in the last three years in medical and surgical review series for Philippine board reviewers during our annual *Balik*-FEU reunion and scientific meetings.

When Yolanda Typhoon hit Samar and Leyte in November, 2013, I initiated and urgently raised funds and organized a humanitarian mission, in partnership with the Medical Mission of Texas, with the FEUDNRSMAF mission team of Las Vegas and FEUMAANI, to Baybay, Leyte in February 01-07, 2014. Our works epicentered at the Western Provincial Hospital where we served victims from Tacloban and Ormoc City.

PRESIDENT AQUINO

continued from page 5

the monetary expenses, and illness among participants...

Let us continue our mission because it is worth the effort and the euphoria of accomplishment. Let us continue this voluntarism and philanthropic work for our *kababayan*.

The PMAC, along with the FEUMAANI, needs to engage the young and talented doctors to share their time and effort to support the organizations through voluntary work in fund raising and to urge all members to get involved and support medical mission for the country that we love most.

Together, we will continue to share our God given talents, time and treasure to the grassroots of poverty. The more we give the more we receive. If we cannot help all, at least help one. We need to do this because if not who will...

Be involved by sharing this e-newsletter to friends and community partners;

Attend PMAC meetings and dinner functions.

Contact the PMAC, if you would like information about the medical mission and how you can provide support to the mission, and

Give financial assistance.

Relative to topic, below is my letter to the Philippine Consul General of Chicago Generoso DG Calonge:

In fairness to the non-Pilipinos who attended the

courtesy call with our President Benigno S Aquino, I would like to recommend that an English version of his speech be distributed to them.

This was a feedback of interest from people of non-Pilipino background.

By the way, thank you for giving the experience for our President to taste the Chicago deep dish pizza that he was longing for sometimes now. This was noted during the second courtesy call we had at the Malacanang Palace, that he wanted to visit Chicago and taste the deep dish pizza.

Furthermore, we were glad that our President acknowledged the PMAC yearly medical mission to the Philippines. He is indeed a man of words and a man of accomplishments.

I am impressed with his leadership geared towards progress for our kababayan and our country.

To the consulate, I would like to congratulate you for an organized welcome to our President of the Philippines.

Mabuhay ang Pilipino!

Let us continue to support each other and promote progress for our country.

advances of such servants.

As such, he is excluded from full participation in Jewish Temple rituals. He would not be allowed to convert to Judaism.

The interaction between Philip, an apostle of Christ and the Ethiopian eunuch bears close examination as a demonstration of how God acts to bring all people to Him in the most unusual circumstances. Despite knowing that he would be turned away by the religious establishment, the Ethiopian eunuch actively seeks God anyway. He reads Scripture and is anxious to learn the meaning of a certain text.

It is in this context that the Spirit of God sends Philip to the Ethiopian. They ask each other questions. Philip enlightens the Ethiopian on a particular text from the prophet Isaiah. He then proclaims the good news about Jesus Christ. The Ethiopian responds by expressing a desire to be baptized. Both Philip and the Ethiopian enter and emerge from the water together. A perfect ending to a conversion story, right? Yet I get to thinking, who converted whom?

When Philip joined the other person in the waters of baptism, did the apostle undergo a conversion as well as his own baptism is affirmed and his mission field re-defined? After all, he was told by the Holy Spirit to go well out of his way to encounter a certain person. Was it perhaps a mutual conversion?

FAITH CORNER

Going back to the text, the Spirit of God did indeed command Philip to go on the road from Jerusalem and Gaza, then go over to the Ethiopian's chariot. They ask each other questions and Philip is given the opportunity to proclaim the good news about Jesus Christ.

Did the Spirit also give the Ethiopian a command to *go and invite* – invite this nice Jewish boy who represents all who embrace the Law of Moses which rejects eunuchs from God's house?

It is my contention that Philip, in this encounter with this genderless foreigner, learned what truly seeking the Lord looks like. What God accomplishes in this encounter is not exactly the same as what the story would look like taken at face value. We can conclude once again that God's Spirit does as it pleases. God's Spirit is not boxed in by human expectations and limitations. Political correctness is of no concern to God.

The Ethiopian eunuch asks Philip a question that pastors and priests are often confronted with by those who seek to become members of the assembly of God. *What is to prevent me from being baptized?* All of us at some point in time may have been asked the same question in some form or another. What is to prevent me from being baptized? What is to prevent my child, my friend, my neighbor, the stranger among us from being baptized? Too young? Many denominations to this day will not baptize infants. Too old? Too poor? Too crippled?

Some require verbal and/or physical expression of understanding the meaning of baptism. What of the child born with cerebral palsy? What of the comatose patient? What of the autistic child? What of the inmate on death row? What of the *Illegal alien*?

Jesus commissioned the disciples, and by extension you and I, to go make disciples of all nations baptizing them in the name of the Father and of the Son and of the Holy Spirit.

Matthew 28: 19

This command does not specify ethnicity, physical attributes, social status, documentation, or location. Whenever there is any hesitation to carry out this commission because of our own prejudices or because we have been misled in our faith by others, we are in need of another conversion experience. These are the times when we need to pay close attention to everyone we encounter, for one may be that silent messenger from God sent by the Spirit asking, *what is to prevent me from being baptized?* What is to prevent me from joining this community of believers, from being part of the Body of Christ? It is not a matter of us seeking God. It is God seeking us. Time and time again, God in Christ orchestrates unlikely relationships that lead to transformation of both sides.

I believe that in the story of Philip and the Ethiopian eunuch, both experienced a mutual conversion event. I pray that you may soon go through such a mutual conversion as well.

CHAIRMAN's Message

continued from page 1

Once again, I would like to invite all of our alumni to attend this special event and welcome you all to join me in honoring the various Jubilee Classes who will be celebrating the respective anniversaries of their graduation from our Alma Mater.

OSCAR C
TUAZON MD

The four-day long festivities will culminate with a grand Saturday dinner ball when we reconnect with old and new friends from across the United States and the world.

I encourage all of our members to reach to our classmates and friends to join us in Las Vegas.

We are especially interested in seeing more of our younger alumni!

Please contact us with any questions or additional suggestions on how we can get in touch with your classmates.

As the next generation of leaders of the Alumni Foundation, we hope you will take this opportunity to learn about getting more involved with our organization!

Rest assured that your tax-deductible donations will help us reach our goals of growing our endowment --- to fund scholarship and to provide FEU greater resources to maintain the highest caliber of teaching, medical graduates and patients' care.

I look forward to seeing you in Las Vegas, on July 8-11, 2015.

OSCAR C TUAZON MD⁷⁴

Balik-FEU 2016

MAY QUOTES

Why, 'tis a happy thing
To be the father unto many sons.
William Shakespeare

The **PHILIPPINE MEDICAL ASSOCIATION in CHICAGO (PMAC)**, **PMAC AUXILIARY (PMACA)**, **PMAC Foundation**, **CIM alumni**, **FEU alumni**, **MCU alumni**, **SWU alumni**, **UE alumni**, **UP alumni**, **UST alumni**, other Philippine medical alumni groups, and 2nd generation Pilipino physicians will hold their annual picnic on **Sunday, June 28, 2015**, from 11:00 a.m. to sundown, at the **Oak Brook Park District SHELTER**, 1450 Forest Gate Road, Telephone (630) 990-4592.

The PMAC and PMACA will also hold elections of board governors. An 11:30-am mass will be celebrated.

As it has been traditional for 55 years, the occasion is a fellowship day, a reunion. Friendship will be renewed. There will be fun, food galore and games for the kids, spouses and guests. Because it is always a special Day, bring your children to help us celebrate this special new day. We will also recognize the fathers, grandparents and their grandkids. The intermedical school softball competition, basketball, football, soccer, card games will be available. Bring your family and invite a friend or two. Don't forget to share a sample of your cooking with others.

The park is bounded by 22nd Street (Cermak Road) on the north, 31st Street (Oak Brook Road) on the south, Route 83 (Kingery Highway) on the west, and Jorie Boulevard on the east. Entrance to the Park is through Forest Gate Road (left turn from Jorie Blvd, just north of 31st St). Westward on Forest Gate Rd, turn right on the first street going north all the way to the end which is The Shelter. Please join us!
